# 101 Music Games For Children: Fun And Learning With Rhythm And Song (SmartFun Activity Books)

## **Synopsis**

This lively and imaginative book is being used in homes and schools in over 13 countries to help children learn about music and sound while they develop the ability to listen, concentrate, be creative, improvise, and trust one another. Using audiocassettes or CDs, of popular songs and simple instruments children and adults get to play listening games, concentration games, musical quizzes, trust games, guessing games, and more. The games are not competitiveâ “ they encourage and reward children for participation, not for winning. The SmartFunActivity series encourage imagination, social interaction, and self-expression in children. To make the books easy to use, games are marked according to appropriate age levels, length of play time, and group size, using helpful icons. Most games are non-competitive and none require special skills or training. The series is widely used in homes, schools, daycare centers, clubs, and summer camps.

Age Range: 4 and up

Grade Level: Preschool and up

## **Customer Reviews**

Being a music educator, I purchased this book in hopes to enhance my music program. I have found it hard in the past to find musical games that young children can enjoy outside of musical chairs! With this book, I will never have that problem. To insure that my students have FUN learning music, we spend the last part of class playing one of these games. It is easy to do because this book

provides you with a guide indicating age appropriateness, how long the game takes (5 min., 15 min., 30 min., etc.), specific number of players needed, and instruments and/or props if needed. Oh, did I mention that you don't have to be a kid to love these games? Well, you don't! There are games in here for those competitive music know-it-alls like myself! Did I mention that this book is great for planning parties? Forget the clown, it's usually a rip off anyway! Besides, music and parties go hand in hand! Last, it's a totally great book! ...

I am a music therapy student and I used this book in constructing activities for music classes at a summer camp. This book had so many ideas for activities with music materials and ideas that were easily adaptable to fit the groups' needs. I especially love that few of these games really have a single winner, so everyone gets to participate and enjoy. I would highly recommend this for music therapists and educators as well as anyone else looking for this type of game for children.

This is a good book for music teachers to have, but don't expect to use all 101 games. Many are variations on a theme, are impractical in the classroom, or simply are not very musical. An example of this is a game where students have to act out the titles of songs, like Charades. Sure, it'd probably be fun, but it's hard to say what the students are actually learning about music from that. I'd say there's 10-15 games I think I might use - or leave for a sub to use. I also would modify most of them to make them more appropriate for a limited classroom space.

After reading the raving reviews I ordered the book - I needed ideas and help because I'm a music teacher who is now teaching elementary music, yet I had limited experience in that area. I couldn't afford the Kodaly books, so I thought this would be a good start. What a disappointment! A lot of the games involve blindfolding the students, which isn't appropriate in classrooms anymore, especially because most elementary music classes will have 20-30 kids, no matter what size the school. On top of that, the games don't actually involve the kids singing much - there are rhythm games, but good ones are very few. Overall, this book seems very outdated in its ideas and games. It wasn't a wise investment for me.

This book is SO GREAT for teaching music and music themes at home. It works for any number of children, but it is best for a small group of about 3-6. I used it with only one, and it worked ok with some modification. Great variety of games that kids really enjoy playing!

I borrowed this book to get some ideas for my K - 5th grade classroom music students. I have around 30 students per class and I found that this book had limited usability for me. There were some good ideas, some that just wouldn't work, and some that weren't really that focused on music. I think that out of all 101 games, I only really liked about half a dozen. Not enough of a resource for me to want to purchase the book for myself.

This book gives a great starting point for creating your own games. It was not as musically educational as I had hoped. I have derived a lot of my own ideas from this book or modified games within it. This book is functional but I was not "WOWed" by it.

Music is fun for play and doesn't always have to be taken so seriously. These well thought-out games are adaptable for so many different moods integrating the rhythm and beauty of auditory art into activity for kids.
