John Feierabend's creative and fun approach to music education breathes new life into the music classroom. This book is full of new and inventive ideas for teaching young students to use their head voices. There are a few songs in this book, but the bulk of it contains warm-ups.

This is another Feierabend winner. It's great for imaginative activities to get elementary music students to experiment with their singing voices...especially developing their head voices. Some examples of activities are vocal sirens and imitating whale sounds.

This is great! My students love all of the activities in the book, and it's truly a great way to get very young singers to explore their head voice.

I learned so much from this book. It was very easy to read and apply to my general music classes.
