## **Customer Reviews**

I bought the book without reading the size dimensions so when I got it in a package smaller than the size of a greeting card I was disappointed. The concept of the book is cute but it literally is only 5 pages long. Save your money!!

My daughter loves this book. It has different textures on each page: bumpy skin, smooth horns, stegosaurus scales, and sticky tongues! The pictures are very bright and vivid. It's so much fun for her to play with. Everytime I pull out her books it's the first one she runs too. I don't think there are enough dino books out there, so I was excited to find this book. The book is sturdy so they can't tear back the edges where the textures are, but the sticky tongue does wear out after a while. But she still likes to poke it.

The book is great except I felt there should be a few more pages for the money. The 2 year old I purchased it for loves it!

A good book for a young child because they can feel the Dinosaurs. Book does not have many pages but it is great for a 3 y/o, he is always opening the book and touching the surfaces of the reptiles. Strictly for young children no older than 4-5 years.

Whether your child is 8 months old to 6-8 years old - I think they will like this book and other 'Touch and Feel' books. The last page in this book is the most fun - I won't spoil the surprise, but it's really icky and makes people laugh out loud.

This book is boring. Not much to touch and feel. The pages are all the same

My 2 year old twin boys and I really like this book! It is short, as others have said. However, that doesn't matter very much to me. I was looking for a "not scary" book on dinosaurs for a 2 year old and this touch and feel book was perfect. They like the rough scales, smooth horns, and rubbery skin. But, most of all they like the sticky tongue! So, it's a fun, not scary book for my boys and it's about dinosaurs. Hard to go too wrong here...

It's a touch and feel book, and it has dinosaurs. So a pretty good hit for my 2-year old who's still enjoying sensory exploration and has a big affinity for dinosaurs. The last dino in the book scares him a bit though.
