Technology: A Reader For Writers

Synopsis

Read. Write. Oxford. *Technology: A Reader for Writers* focuses on the timely and vital subject of information and communications technologies and presents a range of contemporary and classic articles that invite students to consider and engage with questions related to how, why, and in what ways we may be able to critically reflect on ourselves and societies by writing and thinking about technology. Accompanied by group-discussion questions and writing prompts that ask students to engage with many of the same information and communications technologies they are reading about, the readings in *Technology: A Reader for Writers* give students the opportunity to explore, learn, and write about technologies and the many issues and institutions related to them, including education, public policy, healthcare, social ethics, literacy practices, social activism, and global economics, in a unique, purpose-based, and hands-on manner. Developed for the freshman composition course, *Technology: A Reader for Writers* includes an interdisciplinary mix of public, academic, and scientific reading selections, providing students with the rhetorical knowledge and compositional skills required to participate effectively in discussions about technology, science, and society. *Technology: A Reader for Writers* is part of a series of brief single-topic readers from Oxford University Press designed for today's college writing courses. Each reader in this series approaches a topic of contemporary conversation from multiple perspectives.

The style of this compilation was not appreciated and did not allow for sufficient engagement in the

material. That alone made it difficult to follow let alone the somewhat random topics that were supposed to be arranged under one central theme for each section. Each essay as a standalone entity works fine, but compiled in this way it is not fun to read.

It was in good shape, just how I needed it

Great Book, got it brand new from store. It is a must have, it is a really interesting book.
