Space 2015 Calendar: Views From The Hubble Telescope

Synopsis

Space Views from the Hubble Telescope Wall Calendar: Since its mission began in 1990, Hubble has allowed greater understanding of what lies beyond our atmosphere. Each of Space Views from the Hubble Telescope 2016 Wall Calendar's twelve unbelievable images is accompanied by a description of the celestial phenomenon depicted. Important dates in the history of space exploration, as well as this year's solar and lunar eclipses, and major meteor showers are noted throughout. A must-have for the astronomer in your life. Descriptive text accompany each image. Observes major holidays and moon phases

Customer Reviews

This calendar is amazing with detail, even giving you the moon cycle per month. I have purchased other similar calendars, and it's surprising this one isn't the more popular choice. Don't be fooled NY other galaxy calendars, this one outshines the others.

For space-buffs such as myself, the photos from Hubble and other modern telescopes are addictive. Some of the selections for this particular calendar are not among my favorites, but overall it has been quite enjoyable.

The pictures are beautiful and great quality. There was only one month I thought was a little grainy. There are detailed facts accompanying each picture and interesting dates of note in regards to astronomy and space travel/accomplishments noted on the dates of occurrence. I would

recommend and am very glad I purchased this calendar.

My wife like it. it is on our kitchen wall with all the appointments and schedules. My only complain is that I do not any more excuses as to missing an event... It is on calendar

Beautiful pictures, really helps to dress up my otherwise drab office. The calendar portion is good, plenty of room to write-in important meetings or events like birthdays.

Bought the 2014 version and I doubt the new version will be much different. The small pictures (on the back) look great, but the large pictures for each month look awful -- so grainy and blurry! I was really disappointed.

Make your cubicle or work space feel like a galaxy!!! Great images and you get to feel like an astronaut at work. What else could you ask for?

If you love Hubble photos of the cosmos, this is the calendar for you!!! I plan on buying one for 2016.
