I purchased this book for my 22 month old son for Christmas and he loves it!!! Before, bed every night I let him choose which books we read and he has chosen this book every night. He loves flipping up the flaps and calling out the pictures under them. This book has a lot of pictures and words for you child to discover and learn. To be honest, in 3 weeks, we are only on page 4. I am trying to let him soak in everything that we are reading. My only critique is that I wish the flaps were more sturdy. My son is very curious and a little destructive, so I have to be careful about just letting him take the book and read on his own.

This is an ADORABLE book that combines my child's love of opening the flaps with Elmo and all of the characters, plus it has the bonus of being an educational book due to all of the letters of the

alphabet. It not only lists the letters of the alphabet, but it shows pictures of 5 or more items that begin with that letter as well, so the kids can see the words in action. I also really love that there are so many flaps to open in here. There are the big flaps for the letters, but also lots and lots of little flaps to hide items behind that begin with the letters. I have absolutely nothing bad to say about this book. Its fantastic! And so is the Elmo's Numbers book that is in the same format. They are fantastic!

This was our son's first ABC book. We got it when he was 14 months old, and he's loved it from the start! So many colorful pictures to identify and new words to learn. He loves looking under the flaps, and talks about the different characters and what they're doing. At 19 months he's learning his letters.

This is not for a younger baby. I have a 9-month old who loves flap books and Sesame Street but this one is 1) too big with too many flaps on each page (attention span issues) and 2) too difficult to open the flaps. Some of the flaps were hard for me to open let alone the baby. On other flap books, he can open and close the flaps with ease. On this one, the flaps are made of super thick cardstock so they are harder to open and close and do not have a notch or anything that makes opening easier. May be good for an older child for sure.

The lift up flaps are sturdier than some of our other books. My daughter is 18 months old and really likes it. I wish that some of the letters had more familiar words to go with the letters because some of them are very specific to Sesame Street (like Berniece the pigeon for the letter B) or are just odd choices for a children's book. The letters are prominent and easy to point out, but it has only the capital letters, no lower case.

My 20 month old boys loves this book. They enjoy lifting up the flaps and discovering what's behind it. Granted they don't know their alphabet yet, but they do know how to identify and recognize objects in the book. Every night my boys will bring this book over for their bedtime stories and we would have fun opening up the flaps. I purchased this book a few months ago and when I received it I was disappointed that the pages weren't made of heavier cardboard like other board books. The pages are thicker but not enough to withstand the destructive nature my boys would have shown the book. Now that they are 20 months I decided to bring it out again and the book is still in good condition. I would suggest waiting until your child shows more care with books before purchasing

this.

My son is not obsessed with books but he likes them and he loves to "read" them himself (shh, he can't really read but he's 2 so he thinks he can and it's adorable). He goes for this book more than any other these days. He yelped with joy when I gave it to him. There is so much there for him to look at and process and learn- stuff he already knows and builds confidence in identifying them correctly (including beloved Sesame Street characters) mixed with new words and challenges that he also loves but in a different way. It's so much fun to read this with him and to watch him read it to himself. This one he actually can read, and make up his own stories with them too.

My 9-month old LOVES this book. It is FULL of colorful content, words, and flaps that allow my baby to discover...it definitely keeps her curious and busy. She already points to Elmo on every page and it is fun for both of us to enjoy and interact with. I also like that the flaps are thick and sturdy which make it hard for her to rip them out. Another cool feature is that the alphabet letters are big. Visually this book is fantastic. I am very pleased and I highly recommend.
