The Birdwatcher's Coloring Book (Dover Nature Coloring Book)

Synopsis

Thirty detailed illustrations to color depict a wide variety of U.S. and Canadian species and habitats, from an oriole perched in an apple tree to a bald eagle diving for fish in the Alaskan wilderness. Captions identify where species nest. Evoking the joys of nature, this book is a helpful companion to fledgling and experienced birdwatchers alike.

Age Range: 8 - 11 years

Grade Level: 3 - 5

Customer Reviews

For bird lovers of all ages. Inexpensive, 30 different bird species illustrated, many include both males and females. This book is a favorite for many of my school aged grandchildren. The birds are identified by name on each page, so my grandchildren use my Bird identification book as a coloring guide and complete their picture with either crayons or colored pencils. Many of the pictures feature both the male and female of each species. The combination of looking up the birds and coloring them helps my grandchildren remember and easily identify the birds outside at my bird feeder and in the woods. They are especially excited when they spy a female and male and can tell me or their parents what bird it is. I like to color and practice colored pencil techniques on these birds with my grandchildren. The Birds are good sized, simply outlined, and this book is inexpensive, perfect for a practice book to use before I color a more complex picture in one of my more expensive coloring books.

1. 30 pages to color printed front and back of each page, on medium weight, bright white paper.
2. Each bird is identified at the bottom of the page, and some pages have two different

species of birds and most of the pictures have both the male and female.3.
