Curious George At The Zoo: A Touch And Feel Book

Synopsis

Based on the Curious George of PBS Kids, this engaging touch-and-feel board book lets youngsters feel a rhino's rough skin, a fuzzy zebra's mane, and the coats of penguins. All the while, they can search for Curious George, who is hiding on each page: feels George around to see? • For more monkey fun, investigate www.curiousgeorge.com and discover all the latest on Curious George books, promotions, games, activities, and more!

Customer Reviews

My daughter is in love with every touch and feel book we can find at the moment. She just turned one and also discovered Curious George so we bought one more :) We received this book in perfect condition and the touch and feel pages are better than expected. The Rhino is a soft leather feel instead of a fake plastic 'skin.' The giraffe actually has giraffe print where most books just use a solid color. Even the basket at the end was a woven texture instead of just a rough feeling paper. I am very impressed with this book and will be buying "Curious George at the Park" as well!

My grandson was 14 months when I gave him this book while on vacation. The touch and feel feature was great for him. He "oohed and ahhhed" when he rubbed his fingers over the animals. It's a very sturdy book and although he probably didn't grasp all that I was reading to him, he thoroughly enjoyed the book and had me read it over and over to him. I would recommend it to anyone with

small children.

I use this with speech therapy for toddlers. All the kids who like George like it somewhat. It's very simple and short so there aren't as many words to focus on as there are in some other books, but for the kids who really love George it does get their attention. The vocabulary that is targeted in this book (penguin, giraffe, panda bear, etc) is a little advanced for the kids I work with who are still young enough to like the short textured books. For my use, I get more mileage out of the textured books that are very simple in content such as the DK publishing "Kitten" or "Puppy" books.

Great interactive book with colorful pictures and lots of good touch and feel. My son loves it.

My toddler loves this book. She likes to feel the different textures and she loves looking for George. She wants me to read it to her over and over.

My son loves Curious George. He has a Curious George stuffed animal and loves to watch the TV show. He also loves reading books before bed and he's 14 months old, so he's mostly entertained by the touch & feel books. This one looked like a great price so I ordered it. I am very satisfied with this book. Each of the pages has a unique thing to touch: a penguin, smooth "water", a rhino's skin, a rough basket. Also on each page, you have to find where George is hiding! (It's not a flap book but George has his head poking out from behind a tree, rock, etc.) Very cute ideas and well executed in this book. It's also a good size and again, I love the price. I'll have to buy more Curious George books for my son around Christmas time!

We were pretty disappointed in this book since we have such high expectations of Curious George. We both always thought Curious George books were so cute, but the touch and feel book here was only okay. The story was meh. The textures were okay. If we had the chance to flip through it in a store first, we would not have bought it.

If your child is a Curious George fan, this is a great book. It features the new animation of Curious George that has been the style of the cartoon since the movie came out. Some of the books on here for Curious George still feature the old style. In this book, George goes to the zoo. Each page features something for the child to touch. The words are simple, but it is easy to supplement the reading by asking your child how the touchable objects in the book feel, and trying to see if he can

describe them to you. George is also playing hide and seek in this book and the reader is asked to find George. There's no challenge in this, even for a 2 year old. Also why would anyone want to hide at the zoo? But there's that element as well.
