How To Draw Planes, Trains And Boats (Dover How To Draw)

Synopsis

With the help of this guide, children and other beginning artists will enjoy learning how to draw 30 different forms of transportation — most of them composed of simple shapes such as circles, triangles, squares, and rectangles. Easy-to-follow, step-by-step illustrations show how to put these shapes together to form everything from a canoe, biplane, and antique locomotive to an ocean liner, seaplane, and passenger car of a modern train. Fun to draw, these pictures will also help youngsters and budding artists understand the basics of shape, form, and dimension. Blank practice pages are included.
